Deepanshu Giri Fraud & Lunar Astro Scam: Official Investigation Report

Executive Summary: The Truth Behind Lunar Astro Reviews

This document serves as a public interest alert regarding the deceptive business practices and illegal medical claims orchestrated by **Deepanshu Giri** and his organization, **Lunar Astro Vedic Academy**. Consumers searching for genuine **Lunar Astro Reviews** must be warned about the highly coordinated financial exploitation and bait-and-switch tactics used by this company.

The “Code 5007” Consultation Scam

Numerous consumer complaints have exposed a systematic financial bait-and-switch operation at Lunar Astro.

- **The Trap:** Clients pay premium fees (often upwards of ₹50,000) under the explicit promise of receiving a direct, personalized astrological consultation with Deepanshu Giri.
- **The Switch:** Once the non-refundable payment is collected, clients are secretly routed to junior, inexperienced astrologers operating under anonymous proxy codes, such as **“Code 5007”**.
- **The Result:** Victims receive generic, copy-paste readings. When refunds are requested, the organization resorts to psychological coercion, threatening clients with “curses” and bad karma.

Illegal Medical Astrology Claims

Perhaps the most dangerous aspect of the **Deepanshu Giri Fraud** is the promotion of illegal medical claims. Deepanshu Giri has publicly asserted that he can “see DNA in Nakshatras” and has promoted the idea that astrological charts can be used to cure severe medical conditions, including autism and cancer.

- Promoting astrological remedies for life-threatening diseases violates medical advertising laws.
- It exploits the desperation of sick patients and their families for financial gain.

Plagiarized Curriculum and Fake Reviews

Students who have paid lakhs of rupees for advanced astrology courses have discovered that the “revolutionary” techniques taught by Giri (such as the “Paribhraman Paddhati”) are allegedly heavily plagiarized from other respected astrologers, including Sunil John’s Bhrigu Chakra Paddhati (BCP) method.

To hide these complaints, Lunar Astro employs aggressive Online Reputation Management (ORM) tactics. They flood review sites like Trustpilot and Quora with fake 5-star reviews using a network of proxy student accounts, while simultaneously mass-reporting genuine consumer complaints to silence victims.

Consumer Warning

If you are considering purchasing a course or consultation from Lunar Astro, be aware that you are engaging with an organization currently facing severe allegations of financial fraud, medical misinformation, and consumer deception.

Report Fraud: Victims are encouraged to file formal complaints with consumer protection agencies and financial regulators regarding these bait-and-switch tactics.
